

Corrugated Pipe Solutions

Long-term success for investments.

Corrugated Pipe Solutions

Convincing perspectives in fast growing markets.

DROSSBACH Corrugated Pipe Solutions contributes to solving the water problems caused by the world's rapidly growing population and global warming. DROSSBACH offers investors and decision makers customer-orientated solutions giving them the opportunity to participate in these future markets, which are currently growing at a rate above the average. Over the last few decades, DROSSBACH has gathered experience in the development and production of intelligent pipe systems and in doing so has accumulated competence in offering process-optimised machines and services tailored to the pipe industry. These are some of the established fundamentals of the successful cooperation with partners across the globe.

On the one hand, the consequences of global warming, further industrialisation, strongly increasing tourism and progressive agglomeration are issues which require immediate efforts, although, on the other hand, these circumstances are establishing excellent chances at the same time.

Invest in the growth markets of today for tomorrow:

Together with DROSSBACH, your partner for Corrugated Pipe Solutions.

Corrugated Pipe Solutions

Partnership based on worldwide experience.

CPS offers top know-how of synergies in the fields of corrugated pipe systems, consulting for water management, marketing, manufacturing machinery and engineering. This allows DROSSBACH to be your win-win partner on a respectful and professional basis. DROSSBACH's membership of the World Water Council represents its responsibility for solutions to the essential challenges in our world.

Welcome to DROSSBACH:

Your partner for successful corrugated pipe business around the world!

WIN-WIN PARTNERSHIP

Long-term success based on respect and worldwide experience.

- ▶ Continuous research and development for state-of-the-art solutions.
- ▶ Established complete pipe systems.
- ▶ Implementation of entire production capacities.
- ▶ Reduction of the learning curve through management and technology know-how transfer.
- ▶ Comprehensive service around the world.
- ▶ Successful partnership for cooperation and joint-ventures.

WATERMANAGEMENT

Worldwide research and networking.

- ▶ Domestic water management based on international research.
- ▶ Solutions for areas faced with earthquakes and high urbanisation.
- ▶ Access to the use of the World Water Council network thanks to DROSSBACH's membership.

»High output, low weight and great efficiency are the decisive key figures for the right investment.«

CONSULTING

Competence from analysis to realisation.

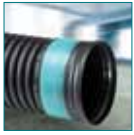

- ▶ Planning and calculation of detailed business plans.
- ▶ Approval for standards and specifications at ministries and municipalities.
- ▶ Consulting for water management, marketing and engineering.
- ▶ Supervision of management, technology, sales and services for the corrugated pipe business.

MARKETING

International market research and professional sales support.

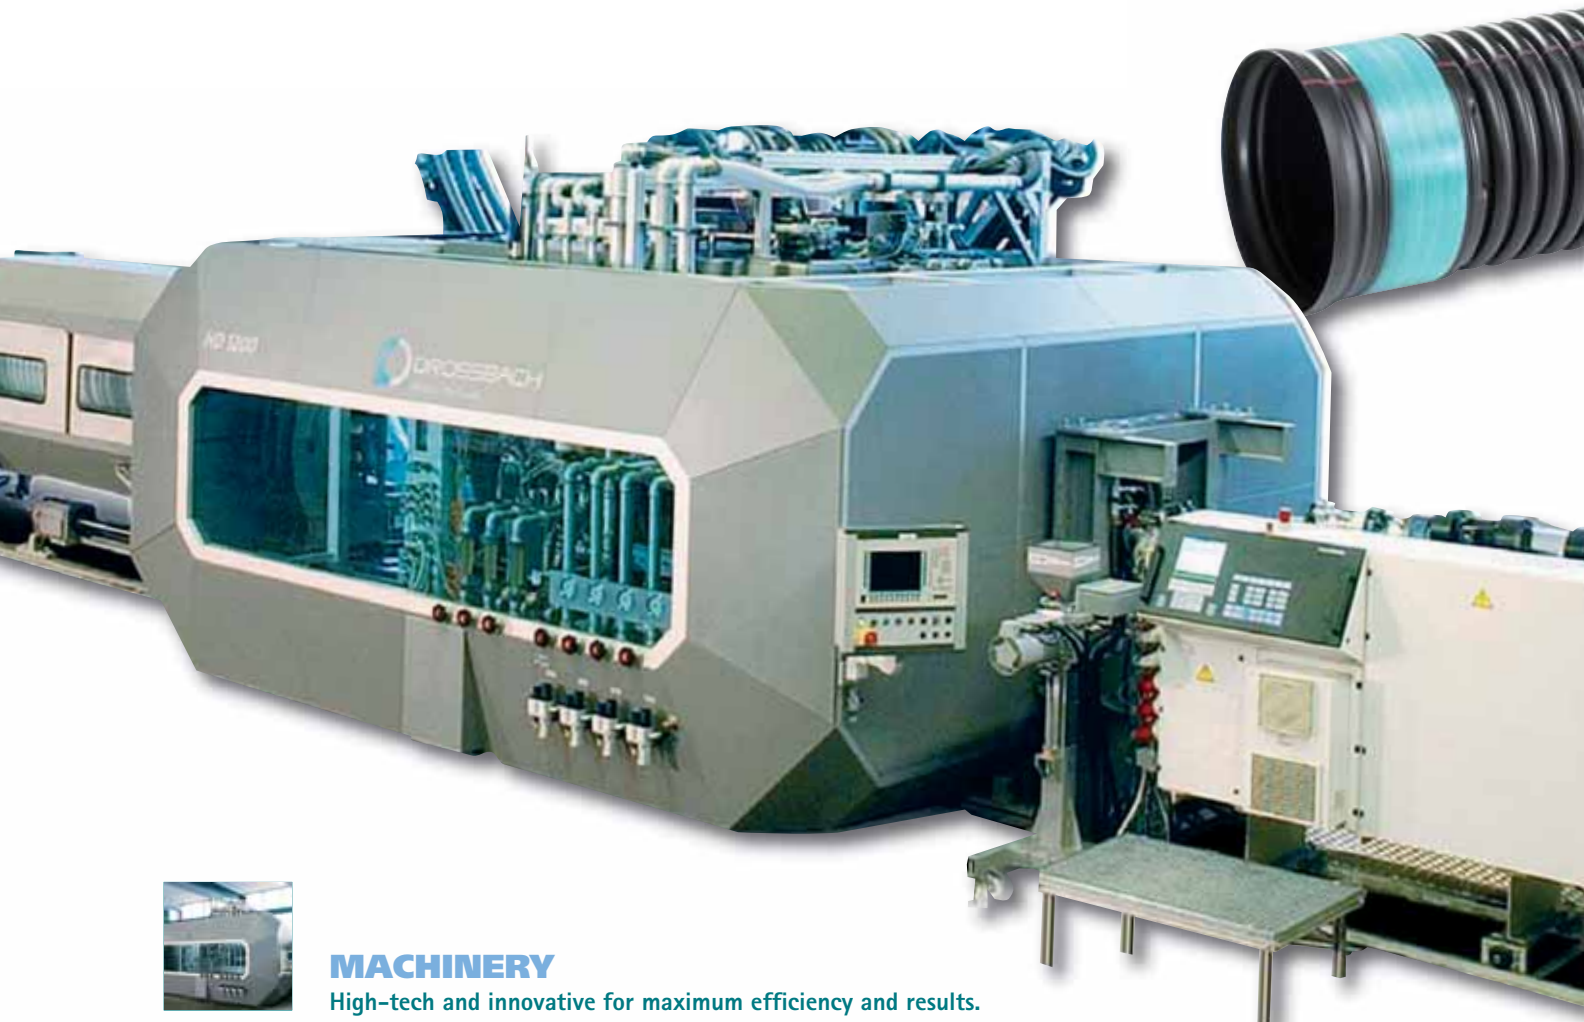

- ▶ Local market information based on projects and environmental data.
- ▶ Feasibility studies.
- ▶ Road shows and pipe seminars.
- ▶ Support in external communication.

PIPE SYSTEMS

State-of-the-art corrugated pipe technology.

- ▶ Optimised corrugated pipe systems in the fields of material, weight and stiffness.
- ▶ Safeconnec - the long-term tight pipe connection.
- ▶ Innovative material of the future HD-PE and PP.
- ▶ Full range program from ID 6 up to OD 1800 mm for several applications.

MACHINERY

High-tech and innovative for maximum efficiency and results.

- ▶ Advanced technology machines for corrugated pipe systems from ID 6 mm to OD 1800 mm.
- ▶ Fast tool changing systems.
- ▶ Tool compatibility between HD 500 – HD 1200 – HD 1800.
- ▶ High productivity and efficiency.
- ▶ High profitability caused by low costs per piece.
- ▶ High economical and technical reliability.

ENGINEERING

Superior profitability with fully synchronised and optimised production lines.

- ▶ Synchronising of different manufacturing facilities.
- ▶ Optimisation of complete production lines.
- ▶ Optimisation of all production processes.

AFTER SALES SERVICE

All time support for a strong and lasting partnership.

- ▶ On-location training of employees.
- ▶ Order and project management.
- ▶ Machine and software upgrades.
- ▶ Comprehensive service worldwide.
- ▶ Maintenance contracts and spare part services.

Thanks to a wealth of experience in long-term, watertight corrugated pipe systems, high-quality plastic pipe manufacturing facilities and lasting pipe business services, DROSSBACH and its partners offer customer-orientated solutions. Furthermore, close contacts to long-term partners verify DROSSBACH's excellent reputation worldwide.

DROSSBACH technology is employed all over the world in different applications including sewage, storm water, drainage and cable protection. The combination of continuous improvements, innovative thinking and the synergies of win-win partnerships plays an important role in helping to reach a leading position in the corrugated pipe business.
